UVC Light Travel Sterilizer Wand

You can't see bacteria and viruses but they are there. Included in our cleaning services we are using UVC technology.

- UVC technology breaks down and eliminates 99.9% of bacteria and viruses. We quickly and effectively sterilize the area and objects.
- UVC light emanates wavelengths and has scientifically has been proven to breakdown DNA of bacteria and viruses. It disables their ability to reproduce while deteriorating them on the spot.

You can feel safe while we sterilize your guest bed sheets, comforters, pillow cases, sofa and chairs, bath towels and even the remote controls. While we can't use the EPA approved Hospital Grade Disinfectant and Sanitizer on everything, what we can't will be treated with the UVC Light Travel Sterilizer Wand.

Clean Republic is gentle enough to use on your linens. Please contact us for your special rate at our new linen facility where we can safely deodorize towels and sheets in preparation for your next guests.

Call us for details about your special rate for cleaning and linen service combination!

Our UVC Light Travel Sterilizer Wand will sanitize and eliminate bacteria and viruses on your comforters, pillow cases, and furniture. Your next guests will feel the comfort and safety booking with you.

Call us for details about your UVC cleaning today!
