UVC Light Travel Sterilizer Wand

You can't see bacteria and viruses but they are there. Included in our cleaning services we are using UVC technology.

- UVC technology breaks down and eliminates 99.9% of bacteria and viruses. We quickly and effectively sterilize the area and objects.
- UVC light emanates wavelengths and has scientifically has been proven to breakdown DNA of bacteria and viruses. It disables their ability to reproduce while deteriorating them on the spot.

You can feel safe while we sterilize your keyboards, waiting room furniture, conference tables, magazines and even the remote controls. While we can't use the EPA approved Hospital Grade Disinfectant and Sanitizer on everything, what we can't will be treated with the UVC Light Travel Sterilizer Wand.

Clean Republic is gentle enough to use on your non fabric furniture. Fabric furniture, decorative items, and magazines will all be UVC Sterilized. Your patients will have the feel comfort and safety while waiting.

Our UVC Light Travel Sterilizer Wand will sanitize and eliminate bacteria and viruses on your conference tables and chairs. Call us for detail about your UVC Cleaning today.
